

Adapted delivery conditions for long length hoses

Semperit Industrial Hoses

Dear customer,

Herewith we would like to notify you about the adjustment of our current delivery conditions for all Semperit extruded long hoses regarding the short length allowance.

The change will be effective as of **April 8th, 2022** and affect your orders of long length hoses as follows:

Standard length: 40m or 50m

min. 95% of the quantity is delivered in fixed lengths
max. 5% of the quantity is delivered in short lengths (**≥10m**)

Standard length: 100m

min. 90% of the quantity is delivered in fixed lengths
max. 10% of the quantity is delivered in short lengths (**≥10m**)

This results in the unchanged maximum allowance of 5% or respectively 10% short length share of the delivery quantity per item. However, the short lengths now start at 10 meters.

All current delivery rules regarding mandrel built hoses remain unchanged.

Together for more sustainability

With the adaptations Semperit is taking another sustainable step to reduce the waste of precious and limited materials and resources. At the same time, we prevent hoses of perfect quality from not finding their usage.

In case of any questions please contact our sales or [customer service team](#) or visit our website to view all [order and delivery terms](#).

With kind regards,
Semperfex Industrial
